Dialysis Concentrate

aus Verantwortung
für die **DIALYSE...**

Company profile

MTN Neubrandenburg GmbH is the result of a Management-Buy-Out and started its operational business on January 1, 2008.

The manufacturing of dialysis concentrate already began in Neubrandenburg, Germany in 1984.

On January 1, 1991, the Swedish Gambro group bought the Neubrandenburg-based plant and operated it until December 2007.

Restructuring measures at Gambro resulted in the decision to withdraw from the operative business of dialysis concentrates in canisters and bulk containers.

However, in order to maintain the location and the manufacturing capacity, the facility was sold to the local management.

All employees of the newly founded company are well aware of the importance in maintaining the manufacturing capacity to ensure the supply of the needed dialysis fluid to dialysis patients.

It is our common obligation to take on this new responsibility and challenge.

MTN has qualified and experienced personnel, more than 65% of whom has worked at the facility for 10 years or more, which is a sign of a healthy working environment based on team spirit.

Our capabilities

- Quality assured manufacturing in accordance with all regulatory requirements
- Efficient laboratory for chemical and microbiological testing for quality control
- Cost control through efficient manufacturing processes
- Flexible manufacturing process in respect to product composition and filling volume by keeping a high productivity
- Canisters for patient specific care based on medical needs
- Bulk containers for convenient handling at hospitals and reducing waste
- All used packaging materials can be recycled environmentally friendly
